Retina Risk

Risk assessment for diabetics in developing sight-threatening retinopathy.

Key features

1. Assess risk levels for developing retinopathy
2. Effective patient education leading to improved quality of (self-)care
3. Track and monitor disease progression
4. Gain insight into your condition
5. Clinically validated
Retina Risk

Calculates diabetics risk of developing sight-threatening retinopathy.

HEALTH MEASUREMENTS

HbA1c (mmol/mol) 50
Blood Pressure 160 / 100

Diabetes Type

None Type 1 Type 2

About Retinopathy

General

What is Diabetic Retinopathy?

Diabetic retinopathy is a complication of diabetes and it can seriously affect vision and lead to blindness. Retinopathy can occur with all types of diabetes. It is a leading cause of blindness worldwide for people who are between 20 and 74 years old (working age). However 90% of blindness and vision loss caused by diabetic eye disease can be prevented with regular dilated eye examinations and timely treatment. It is absolutely critical that every patient with diabetes understands that diabetic retinopathy often causes no symptoms until a lot of damage has already occurred.

HealthyMe

Connect and secure all your health records into one mobile application.

Key features

1. See, search and sort your key health information from your mobile device

2. Includes medications, conditions, vaccinations, prescriptions and encounters

3. Record your key measurements and fitness data e.g. weight, BP, blood sugar, pulse rate etc.

4. Share your health data with other providers

5. Carry your records for key health conditions – offline and on the go
HealthyMe

Connect and secure all your health records into one mobile application.
VaxAbroad

Find out if you have the required vaccinations to travel to different countries across the world.

Key features

1. Keeps a record of all your vaccinations
2. Connects to your medical data via digi.me
3. Pick your travel destination and check to see if you’re covered
4. Ability to easily share your vaccination records if need/wish to

Iceland, US/UK soon  Health  Consumer
VaxAbroad

Find out if you have the required vaccinations to travel to different countries across the world.
MyDuchenne

Monitor your child’s muscular dystrophy.

Key features:

1. Enabling parents, carers and patients to help better track and understand their condition
2. Track and record key fitness data measurements/observations
3. Provides key health insights in easy to view graphs
4. Monitors fitness, body growth and other key data
5. Provide opportunity to share data with healthcare professionals and for research
Monitor your child’s muscular dystrophy.
Finsights
Private financial dashboard, the personal finance manager that gathers data from all your accounts and categorises expenses.

Key features

1. View all your financial information in one place
2. See, search, filter and sort your finance data
3. Understand your spending habits
4. Search your transactions
5. Effectively manage your finances
